The Sound of Light

Paul leaves his small town life to go to college in New York City. There he meets a friend who opens up a world of perspective and adventure he never knew existed. It is a coming of age story encompassing an honest attempt at philosophical, social and religious speculations; all while falling in love with the love of his life...again.

The Sound of Light

My littlest girl has always been a bit peculiar. It was nothing I could ever put a finger on, but I always knew there was something inside her that made her a different kind of special. A deeper kind. K'acy's got a light around her, one that'll just about knock you

over, especially if you don't see her coming. She's got music in her soul, too. Deep, resonating music that echoes and hums, just like the notes that come from the bass guitar she's had attached to her hip since the day she turned thirteen years old. She's got a hell of a secret, yes, but she does what she's got to do to make it one worth having. She takes care of people. She changes their stories. I spent my life telling both of my girls that you always gotta do what's right, even when it hurts, and it makes me proud to know she was listening. I saw the way she looked at that boy on the day they met, and I knew right then that things were going to change. Two

different people from two different worlds is nothing but a recipe for heartbreak, and when the lies pile higher and higher, it can change a person into something they're not. It took me dying all those years ago to finally figure out just exactly how special my K'acy really is, and even though I'm not with her anymore, I don't want that boy and his family to change her. I want her to keep doing what's right, even when it hurts. Because that's who she is inside. That's her deeper kind of special. **This stand-alone novel by Claire Wallis is intended for mature readers age 17 and up**

The Sound of Light
Hal Leonard Corporation

The Sound of Light is a sweeping overview of the history of gospel music. Powerful and incisive, it traces contemporary Christianity and Christian music to the 16th century and the Protestant Reformation after examining music in the Bible and early church music. From the psalms of the early Puritans through the hymns of human composure of Isaac Watts and the social activism of the Wesleys, gospel music was established in 18th century America. With the camp meeting songs of the Kentucky Revival, the spirituals that came from the slave culture, and the hymns from the great revival after the Civil War, gospel music advanced through the 19th century. The 20th

century brought recording technology and electronic media to the table. Gospel music has developed with Christian revivals and the history of American gospel music is the history of Christianity in America. Gospel music reflects the American spirit of freedom and the free market as a Christian culture emerges in the 20th century, providing a spiritual as well as economic foundation. The Sound of Light presents gospel music as part of the history of contemporary Christianity. It is a work broad in scope that defines a music essential to understanding American culture as well as American music in the 20th century. Don Cusic is the author of ten books, including

the biography Eddy Arnold: I'll Hold You in My Heart and an encyclopedia of cowboys, *Cowboys and the Wild West: An A-Z Guide* from the Chisholm Trail to the Silver Screen. He joined the faculty at Middle Tennessee State University in 1982, teaching courses in the music business. He earned a Masters and Doctorate in Literature from MTSU. Since August of 1994, Cusic has been Professor of Music Business at Belmont University.

This book is a collection of essays and original material that introduces the avant-garde artist-collaborators, La Monte

Young and Marian Zazeela to those unfamiliar with their life and art, as well as providing the more acquainted readers with new and useful insights and analyses of the fundamental issues in their life and work. The book explores the recurring themes that have influenced Young's minimalist music and Zazeela's ongoing engagement with the use of light in art. These themes include the importance of nature and its natural shapes and sounds, the importance of mathematics and organized tuning systems based on natural harmonics, enhanced attention spans and increased sensitivity to differences within apparent sameness,

extensions of time, and alterations of space. Essays by Terry Riley, John Schaefer, Henry Flynt, Christine Christer Hennix, Mitchell Clark, Kyle Gann, Ben Neill, and Robert Palmer are included. Young and Zazeela contribute to the book with original text materials that focus on continuous sound and light environments.

The Physics of Music and Color *Springer Nature*

This undergraduate textbook aids readers in studying music and color, which involve nearly the entire gamut of the fundamental laws of classical as well as atomic physics. The objective bases for these two subjects are, respectively, sound and light. Their

corresponding underlying physical principles overlap greatly: Both music and color are manifestations of wave phenomena. As a result, commonalities exist as to the production, transmission, and detection of sound and light. Whereas traditional introductory physics textbooks are styled so that the basic principles are introduced first and are then applied, this book is based on a motivational approach: It introduces a subject with a set of related phenomena, challenging readers by calling for a physical basis for what is observed. A novel topic in the first edition and this second edition is a non-mathematical study of electric and

magnetic fields and how they provide the basis for the propagation of electromagnetic waves, of light in particular. The book provides details for the calculation of color coordinates and luminosity from the spectral intensity of a beam of light as well as the relationship between these coordinates and the color coordinates of a color monitor. The second edition contains corrections to the first edition, the addition of more than ten new topics, new color figures, as well as more than forty new sample problems and end-of-chapter problems. The most notable additional topics are: the identification of two distinct spectral

intensities and how they are related, beats in the sound from a Tibetan bell, AM and FM radio, the spectrogram, the short-time Fourier transform and its relation to the perception of a changing pitch, a detailed analysis of the transmittance of polarized light by a Polaroid sheet, brightness and luminosity, and the mysterious behavior of the photon. The *Physics of Music and Color* is written at a level suitable for college students without any scientific background, requiring only simple algebra and a passing familiarity with trigonometry. The numerous problems at the end of each chapter help the

reader to fully grasp the subject.

Waves of Light and Sound *Carson-Dellosa Publishing*

In *Waves of Light and Sound*, students will learn about electromagnetic and mechanical waves, the properties of waves and sounds, pitch, amplitude, and much more. Readers will love discovering new information in this chapter book while also reinforcing learned skills with comprehension and extension activities. The *Let's Explore Science* series allows readers to dive into the world of fascinating science-related topics while strengthening reading comprehension skills. Each 48-page title features full-color photographs, real-

world applications, content vocabulary, and more to effectively engage young learners.

The Sound of the Sea: Seashells and the Fate of the Oceans *W. W. Norton & Company*

A Science Friday Best Science Book of the Year A Kirkus Reviews Best Nonfiction Book of the Year A Library Journal Best Science and Technology Book of the Year A Tampa Bay Times Best Book of the Year A compelling history of seashells and the animals that make

them, revealing what they have to tell us about nature, our changing oceans, and ourselves. Seashells have been the most coveted and collected of nature's creations since the dawn of humanity. They were money before coins, jewelry before gems, art before canvas. In *The Sound of the Sea*, acclaimed environmental author Cynthia Barnett blends cultural history and science to trace our long love affair with seashells and the hidden lives of the mollusks that make them. Spiraling out from the great cities of shell that once rose in North America to the warming waters of the Maldives and the slave castles of Ghana, Barnett has created an unforgettable account

of the world's most iconic seashells. She begins with their childhood wonder, unwinds surprising histories like the origin of Shell Oil as a family business importing exotic shells, and charts what shells and the soft animals that build them are telling scientists about our warming, acidifying seas. From the eerie calls of early shell trumpets to the evolutionary miracle of spines and spires and the modern science of carbon capture inspired by shell, Barnett circles to her central point of listening to nature's wisdom—and acting on what seashells have to say about taking care of each other and our world.

The Birth of Science

Springer Nature

This book reveals the multi-generational process involved in humanity's first major scientific achievement, namely the discovery of modern physics, and examines the personal lives of six of the intellectual giants involved. It explores the profound revolution in the way of thinking, and in particular the successful refutation of the school of thought inherited from the Greeks, which focused on the perfection and immutability of the celestial world. In addition, the emergence of the scientific method and the adoption of mathematics as the central tool in scientific endeavors are discussed. The book then explores the delicate thread

between pure philosophy, grand unifying theories, and verifiable real-life scientific facts. Lastly, it turns to Kepler's crucial 3rd law and shows how it was derived from a mere six data points, corresponding to the six planets known at the time. Written in a straightforward and accessible style, the book will inform and fascinate all aficionados of science, history, philosophy, and, in particular, astronomy.

comes a prize-winning tour de force - an intimate portrayal of the drug wars in Colombia. Juan Gabriel Vásquez has been hailed not only as one of South America's greatest literary stars, but also as one of the most acclaimed writers of his generation. In this gorgeously wrought, award-winning novel, Vásquez confronts the history of his home country, Colombia. In the city of Bogotá, Antonio Yammara reads an article about a hippo that had escaped from a derelict zoo once owned by legendary Colombian drug kingpin Pablo Escobar. The article transports Antonio back to when the war between Escobar's Medellín cartel and government forces played out

violently in Colombia's streets and in the skies above. Back then, Antonio witnessed a friend's murder, an event that haunts him still. As he investigates, he discovers the many ways in which his own life and his friend's family have been shaped by his country's recent violent past. His journey leads him all the way back to the 1960s and a world on the brink of change: a time before narco-trafficking trapped a whole generation in a living nightmare. Vásquez is "one of the most original new voices of Latin American literature," according to Nobel Prize winner Mario Vargas Llosa, and *The Sound of Things Falling* is his most personal, most contemporary

novel to date, a masterpiece that takes his writing—and will take his literary star—even higher.

The Sound of All Things

National Geographic Books

Experience the sights and sounds of 1930s Brooklyn and Coney Island through the eyes—and ears—of a hearing boy and his deaf parents. A Brooklyn family takes an outing to Coney Island, where they enjoy the rides, the food, and the sights. The father longs to know how everything sounds. Though his son does his best to interpret their noisy surroundings through sign language, he struggles to convey the subtle differences between the "loud" of the ocean and the "loud" of a roller

coaster. When the family drops in at the library after dinner, the boy makes a discovery. Perhaps the words he needs are within reach, after all. Myron Uhlberg's story, based on his own childhood experiences, covers the almost unique topic within children's books of children raised by deaf parents. Ted Papoulas beautifully and sensitively portrays the family's day and brings the whole experience to life for readers.

DoC BiC's history as a disciple of Christ is long and complex. His life as a physician, surgeon and career military officer (Colonel) was built upon a spiritual foundation dating as far back as he can remember, or as he puts it: "at least since a toddler on my mother's lap in devoted church life." Doubting that he ever did consciously not believe in God, and Christ as his Savior, he

does note his public formal declaration as early as around the age of twelve, already well into a Christian life of worship. Growing up in the projects of Bradenton, Florida afforded the early honing of prayer skills and spiritual warfare. And, his subsequent migration through various Protestant denominations and Catholicism helped him develop a mature view of the commonality of true worship as well as an appreciation of the divisiveness of bias within the body of Christ. He credits non-biblical doctrine and tradition as a severe stumbling block until God finally rescued him from it. Now, as he makes his rounds through non-denominational fellowships, his grey-

haired perspective advances into senior mentoring and blessing of his brothers and sisters, in his love for the Kingdom of God. Long ago recognizing his calling into the office of Teacher, he has pursued his studies and support intermixed with his secular careers, always devoted to staying attuned to God's next mission for him. He partners with a devoted wife of 36 years who wears a mutually beneficial gifted intercessory prayer calling, as well as being blessed by gifted callings upon his children, equally beneficial and mutually supportive. His only pursuit today is to "Be Still", hear his Father's voice, and then move out: "I was born into death, I died into birth,

and now I live in immortality to serve
my Father."
