On Purpose

Selling Your Company with Intention and Purpose

On Purpose, Selling Your Company With Intention And Purpose! was written as a guide for the small business owner to understand the steps involved in the process of selling a company for maximum value. Most business owners will only sell a company once or twice in a lifetime making them inexperienced at best. Hiring a business broker is one of the last steps you'll take in selling your company. I wrote this book so you can better understand the steps you need to take to begin the process of selling a company and maximize the value for all

parties. I pull back the curtain and shed light on important aspects of selling that most buyers don't understand until it's too late. I arm you with the insight and experience needed to prepare yourself and your company for sale and successfully work through the sales process. After reading this book, you will be able to plan confidently and follow through with a successful sale of your company.

Breaking the Chains of Capitalism

An Evolutionary Journey to True Freedom

This book offers for consideration an integrated social economic structure and technical solution capable of ending the predatory evolution of our species. This

book also explains the primary factor responsible for the most preventable suffering and death throughout the evolutionary development of our species and how to correct this dysfunction at its source. It also describes how our species is undergoing a natural evolutionary transition from creatures still under the control of our predatory instincts into enlightened beings capable of creating technically advanced societies free of social economic competition for survival. This book explains how subjective realities are induced as a powerful form of psychological manipulation and used to control the working class populations for thousands of years. It also describes how the effects of artificial selection have altered the intellectual evolutionary development of our species to make our

systematic exploitation under capitalism seem like an acceptable social economic system. The integrated solution in this book describes the creation of an automated community infrastructure capable of supporting a self-replicating technically advanced predator free society. The solution also offers exponential growth of a global network allowing more families to end their predatory competition for survival and start helping others wanting to make the transition.

An ex-hacker, a sexy college professor, stolen top secret hardware, a cover-up, a kidnapping, a government conspiracy, hacked defense computers, FBI, CIA,

NSA, Armageddon. An excerpt from the actual deposition transcripts: "Let the record reflect that this deposition commenced at 9:15 am on December the 3rd, 2004 at the FBI offices in Atlanta, Georgia. Present for this recording are Special Agent Alvin Dirk, the Honorable Judge Ramiro Vasquez, and the witness, Robert O. Blain. This deposition is merely a recording of the events which transpired at Norwood University and is not now nor ever will be part of any trial or prosecution. Go ahead." "My name is Bobby Blain. Most people seem to think it all started when Dr. Jennings hired me, and all the computers started getting hacked. It was easy for people to think that, because I have a history and got myself in some trouble when I was younger. I hacked

some computers and almost got the president impeached, but it really started before that, when I still worked for Dr. Karlyn." "Dr. Karlyn gave me a chance to redeem myself by allowing me to work on his computer for him. Then one day, this scientist I had never seen before comes and gives Dr. Karlyn a device. I was never told what he wanted, but I think he wanted Dr. Karlyn to help him reverse engineer it. I was only asked to build an interface to attach it to the computer. Dr. Karlyn did the rest. I think he figured out how to turn it on, but when he did, strange things started to happen." "We didn't know it then, but it turns out the device was stolen from a government facility. I don't know where they got it, that is more classified than this deposition. I can tell you with

absolute certainty that they didn't make it themselves. I'd like to tell you more, but I don't think I'm allowed." "Anyway, someone at the university needed to get Dr. Karlyn out of the way and falsely accused him of inappropriate conduct with a student. He could have fought it, the dean believed him, but he decides to leave the school anyway. Before he goes, he gives his computer to Professor Jennings and he gives me a letter of recommendation, so after I help deliver and setup the computer, she agrees to hire me." "The first night it is up and running, at least two attempts are made to hack into the computer. I forgot to mention that even before I deliver the computer, this guy tries to break in and steal something from it, but I was there and he didn't get anything." "I can't

divulge any secrets about Professor Jennings' project here, but my part is to prove that her process would work if she were given enough computer resources, so I re-write her process to work across a network and run on thousands of computers." "That's when things got really crazy. Someone keeps trying to hack into our computer; someone hacks the entire school and the phone company. Professor Jennings' secretary is kidnapped. The FBI gets involved, but they're chasing the wrong people for reasons only they can tell you." "Then someone plants a virus on our computer and the next thing we know, it's spread all over the internet, including some very sensitive government computers. Meanwhile, our project continues to gain speed and surpass anyone's

expectations." "When the FBI come in and learn that the device that was given to Dr. Karlyn is actually some super cool futuristic computer that is able to grow and build more circuits for itself, they want to disconnect the computer and confiscate it." "That's when computers all over the world go out of control. The pentagon and all the armed forces are helpless. Air traffic is grounded. All the computer problems are traced back to the professor's computer. The FBI want it dismantled more than ever, but the academics involved want to get the device to relinquish control over the world before they do." "And, well, I guess that's all I'm allowed to say, thank you."

Groomed for a place at a Big Name

School since their obsessed, status-conscious helicopter parents passed out cigars at the Stockstill General Hospital Neonatal Unit, the privileged students of Pembrocton College Preparatory are ratcheting up the stakes in the race to get into the nation's most prestigious colleges. The PCP juniors are gloating, jubilant at the rumor that the valedictorian presumptive has received a B on her report card, a grade that will relegate her to in-state hell. Her heir apparent, a three-generation Yale legacy, is the sole mourner at the demise of her future—if only because her thoughtless academic lapse is going to derail his plans to attend MIT. Across town, in the graffiti-covered halls of Stockstill High School, the students slink to class, praying that they arrive without

a knife wound—and dream of ivy-covered walls. And with the help of a take-no-prisoners principal and an enterprising parent, the students at SHS dare to encroach shamelessly on territory normally reserved for their wealthy private school rivals. Join the fray as a memorable cast of characters engages in the latest rage in extracurricular activities: college admissions as a blood sport. Laugh out loud funny, The Applicants lampoons the heights we scale—and the depths to which we sink—to get into the “right” college. ?
