Frog Reproductive System Diagram Answers

In male frog the
ureters convey the
sperms and urine, and,
hence, are called
urinogenital ducts. The
ventral surface of each
kidney has a yellow
coloured adrenal or
supra renal gland of
endocrine function. To
the anterior of each
kidney are attached
numerous finger-like
fat bodies, a testis in
male and ovary in
female.

Both male and female frogs have their own reproductive system where gametes for reproduction are produced. Male frog has testes which produce sperms and eject it through the cloaca. In a female frog, a pair of ovaries produce ovum and pass it to oviduct which opens into the cloaca. The cloaca is a common pathway for excretion and reproduction.

The frog's internal

organs are exposed below, label the following diagram (each letter with correct name). Frog Dissections: Dissecting frogs is a common part of the curriculum in high school ...

The frog s internal organs are exposed below, label the ...

The male reproductive system of frog consists of following organs; Testes: It is one paired, yellowish colour, oval shaped which is encircled by peritoneum (mesorchium) and are attached to the dorsal wall of the kidney. Each testis consists coiled structures called seminiferous tubules that are connected each other by connective tissues.

Reproductive

system of frog | Notes, Videos, QA and Tests ...

Frogs reproduction and fertilization occurs externally, which means that the eggs must be released for the male to fertilize them. Male and female frog genitalia is housed within a frog's body, but male frogs technically have no penis and females have no vagina. Instead, both release their sex cells through holes located in their bodies (for this specific purpose).

How do Frogs Reproduce? - Frog Reproduction - Copulation ...

The male and the female reproductive systems are well developed. The male reproductive system includes the following

organs, a pair of testes, Vasa efferentia (10-12 in number) and a urinogenital duct that opens into the cloaca. The cloaca is a chamber which is used to pass the fecal matter, urine as well as sperms to the outside.

Frog: Morphology, Anatomy, Body Systems with Questions and ...

In female frogs, ovaries shed the mature eggs in coelomic cavity. Eggs enter oviducal funnel to reach oviduct. Eggs enter cloaca through oviducts of both sides. In breeding season, frogs perform a false copulation: the act of amplexus so that both the sexes release huge number of gametes together in water. Gametes come out through cloacal

aperture.
