Hydroponic farming saves water which in turn helps with waste management. Plants that grow in hydroponic systems grow faster than plants grown in the soil. For example, hydroponic lettuce is ready for harvesting in 35 days. Hydroponic systems help to eliminate soil problems like poor nutrient content, insects and soil-borne diseases.

Hydroponics Farming 101: The Complete Guide For Beginners ...

A Complete Hydroponics Guide for Beginners. Hydroponics refers to the method of growing plants without placing them in the soil; this is why it is also known as the soilless method of growth. This method of growth can be used for several plants such as fruits, vegetables and herbs including marijuana. The plants that are grown using this method are usually placed in soilless mediums while utilizing the needed nutrients through a water mixture for their growth.
