Darwin and the theory of evolution - The British Library

Darwin's Theory of Evolution: Definition
Darwin defined evolution as a process of "descent with modification." He believed that some organisms within a species have trait variants that make them fitter and more likely to reproduce. Over time, inherited modified traits become dominant in the population, and a new species may emerge.

Theory of Evolution: Definition, Charles Darwin, Evidence ...

The English naturalist Charles Darwin (1809-1882) had developed the Darwinism theory in biological evolution and others, stating that through the

natural selection of small, inherited variations that increase the individual's ability to compete, survive, and reproduce, all species of organisms arise and develop. This theory is also known as Theory of evolution.
