Solution Mining Research

The Solution Mining Research Institute (SMRI) is a research and educational organization focused on solution mining. The organization is supported by more than 150 dues-paying member organizations from around the world.

Solution Mining Research Institute

Most solution mining is by heap leaching, in which the extractant solution is trickled over broken ore on the surface or in underground workings; less common is injection into underground aquifers. The consequence of the excavation of open pits and other mining-related disturbances is that sulfide minerals previously isolated from the atmosphere are exposed to oxygen.

Solution Mining - an overview | ScienceDirect Topics

Solution mining refers to the production of salt (or potash, or other soluble products) by pumping water into subterranean salt deposits, found in many parts of the world, dissolving the salts and pumping the brine to the surface for drying and further use.
