Another important theoretical approach to the concept of social structure is structuralism (sometimes called French structuralism), which studies the underlying, unconscious regularities of human expression—that is, the unobservable structures that have observable effects on behaviour, society, and culture. French anthropologist Claude Lévi-Strauss derived this theory from structural linguistics, developed by the Swiss linguist Ferdinand de Saussure. According to Saussure, any language is ...

Social structure - Structuralism | Britannica

The approach gained prominence in the works of 19th-century sociologists, particularly those who viewed societies as organisms. The French sociologist Émile Durkheim argued that it was necessary to understand the “needs” of the social organism to which social phenomena correspond. Other writers have used the concept of function to mean the interrelationships of parts within a system, the adaptive aspect of a phenomenon, or its observable consequences.
