For agriculture to be sustainable, land and water must be used efficiently to reduce negative impact on the environment and ensure resilience to climate change. We can't achieve global food security without preserving the services that ecosystems such as trees and forests provide, and we can't sustain forests without thinking of how we will feed a growing global population.

Environmental sustainability in the CAP. The common agricultural policy (CAP) has three clear environmental goals, each of which are echoed in the European Green Deal and Farm to Fork strategy: tackling climate change; protecting natural resources; enhancing biodiversity. Each of these goals are supported by the CAP's promotion of organic farming and the responsible management of inputs like pesticides and fertilisers.
