Economic Sentiments takes up late-eighteenth-century disputes over the political economy of an enlightened, commercial society to show us how the “political” and the “economic” were intricately related to each other and to philosophical reflection. Rothschild examines theories of economic and political sentiments, and the reflection of these theories in the politics of enlightenment.

The recent backlash against globalization in many advanced economies raises questions about the source of this protectionist sentiment. Traditional accounts generally attribute the welfare consequences of trade to skill level or industry characteristics, or instead emphasize the nonmaterial determinants of support for openness.
