Resilient Network Systems makes adaptive access management software for identities you don't (or can't) manage. Our network-centric, distributed architecture is highly flexible and scalable, allowing complex enterprises to safeguard their data and applications, while enabling more collaboration and information sharing.

Resilient Network Systems Company Profile - Office ...

My final tip for building resilience is to build out your social network. High levels of social support have been associated with improved psychological and physiological outcomes, like reducing stress-related illnesses, increased self-confidence, improved problem-solving and the release of the

bonding hormone oxytocin, which reduces fear and anxiety and improves mood.

Building resilience - 4 things you and your team need to do

Maintain bi-directional control for secure, adaptive access through real-time, policy-driven workflows. Easy to integrate with your existing IAM and security solutions to extend their power beyond the enterprise. Meet your modern information sharing needs with our scalable, network-based architecture.

Home - Resilient Network Systems

In computer networking, resilience is the ability to "provide and maintain an acceptable level of service in the face of faults and challenges to normal operation." Threats and challenges for services can range from simple misconfiguration over large scale natural disasters to targeted attacks.
