### Green Building Guidelines

Sustainable or "green" building is the concept of using resources more efficiently while creating more energy-efficient and sustainable homes, offices, schools and other buildings. The increased popularity of green building design and construction has given rise to a variety of approaches that aim to guide architects, designers, materials specifiers and builders in how to build "green."

### Standards & Codes That Guide Green Building Concepts ...

Federal, state, and municipal agencies across the country such as the General Services Administration (GSA), Department of Energy, Department of Health and Human Services, and the Environmental Protection Agency, took an early lead in incorporating energy efficiency and sustainability by following green building guidelines in the design, construction, and renovation of Federal facilities. Most states and many major cities have also incorporated green into their internal building requirements ...

Both the public and private sectors in the United Kingdom promote green building. Presently, there are already regulatory mechanisms in place that establish Britain's commitment to this kind of building construction. The government, for instance, set out a target that by 2016, all new homes will have zero carbon emission and it also includes a progressive tightening of energy efficiency regulations by 25 percent and 44 percent in 2010 and 2013, respectively. The UK Building Regulations set requi
